

Scrapbook Video Theme-1

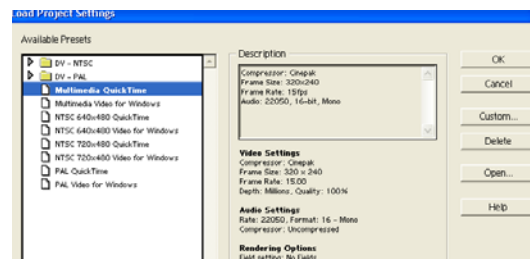

Directions: In this project you will produce a very basic 60 second “scrapbook video” from scanned pictures using Adobe Premiere.

1. **Set goals** (decide on a theme and fill out blank line below)
2. **Create project folder** named “**yourname scrapbook1**” inside your video folder to hold your images, audio, titles, and project file.
3. **Gather your content**
 - a. Scan your pictures...at 150 resolution, save as TIFF’s. Crop when you scan where you can. You should know what order you want your pictures in...a good idea would be to save them with a number in the file name (ex. Dad1, mom2, me3, me4, bro5, sis6, etc.)
 - b. Rip 2-3 audio files from CD using Nero Express (you’ll only use a total of 60 seconds worth this time)

Project Settings: Choose the preset **Multimedia QuickTime**...don’t forget to adjust preferences before you import. (Edit-Preferences-General Still: lock aspect & default duration)

Your movie should include:

- Media: 12 (5 seconds each) scanned pictures, 2-3 “plug-in” titles (Deko or Inscrber), 2-3 audio clips
- Different Transition effects between each image
- Cross fade audio
- Use of motion settings and fading for “titles”

- ✓ Export using the preset **Multimedia QuickTime** settings as “**yourname scrapbook1**” in your project folder
- ✓ Turn in this sheet stapled to a print-screen of your project folder (viewed as details) and a print-screen of PPJ showing cross fades
- ✓ Create a shortcut of your exported MOV file on the desktop for instructor to assess

Goal/Theme: _____

Scoring Guide:

Criteria	Poor	Average	Excellent
Captured Media (quantity) (4)	0 Media not captured.	1-3 Missing part of media.	4 Quantity meets requirements.
Theme (consistency) (2)	0 Media inconsistent with theme/each other.	1 Some media is not relevant.	2 Images and audio are relevant to theme.
Images (5)	0 Sloppy scanning or images are distorted in movie.	2-3 Images may be scanned off-center or have white borders.	4-5 Quality scans. Appropriate aspect ratio.
Audio (3)	0	1 Audio levels “jump” or not quality audio capture.	2-3 Quality cross-fades. Quality audio. Audio at same level.
Titles Design: Text (2)	0 Unreadable and distracting text.	1 Text size too small or bad choice of typeface.	2 Readable typeface and size, contrast with background. Inside safe-zones.
Transitions (4)	0 Missing many transitions	1-2 Missing a transition or duplicate transitions used.	3-4 Different transition effects used between each image.
Motion settings (2)	0 Motion settings not used.	1 Speed or effects of motion distracts from video.	2 Motion settings professionally used on titles.
First Impression/Creativity (3)	0	1-3 Could have given more effort. May have spelling error.	4 Original, creative. Catches viewers’ interest.
File Management (2)	0 Files everywhere.	1 File organization problem.	2 Project folder w/sub folders appropriately organized.
Output (2)	0 Not exported.	1 Not exported properly.	2 Final project exported properly as MOV file.
Total			30/2=15
